

FASTA Analysis Report

A professional genomic analysis report generated from uploaded FASTA sequences including GC content analysis, comparative visualization, and sequence trend interpretation.

Generated using FASTA Analyzer Dashboard

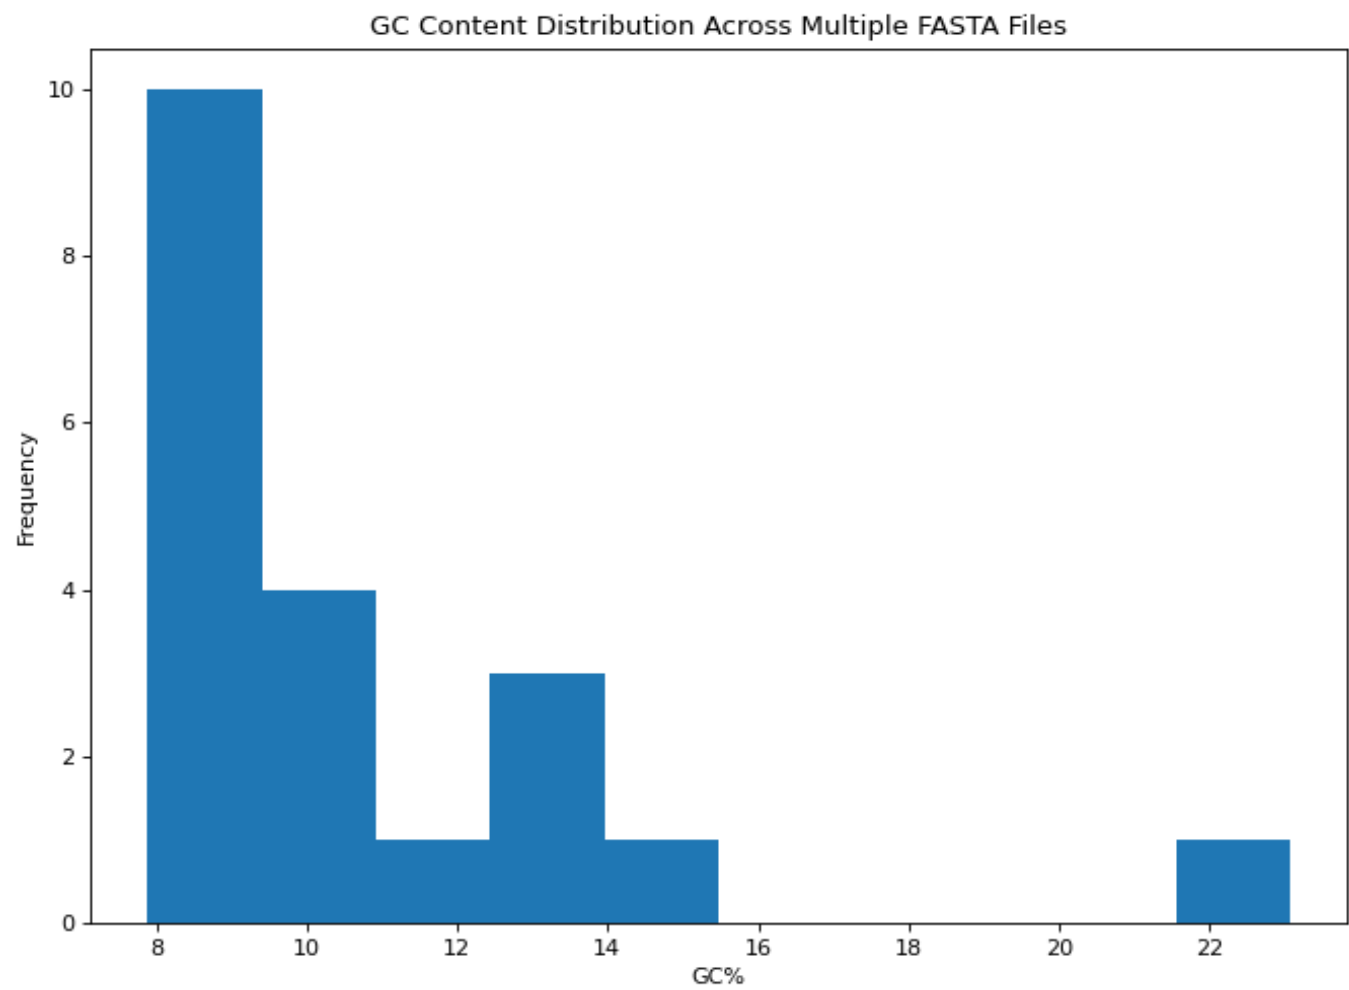

Sequence Overview

This section summarizes uploaded FASTA sequences including protein information, sequence length, and GC content values used for downstream analysis.

Protein Name	ID	Length	GC %
AAA63473.1 albumin, partial [Aquara	AAA63473.1	382	10.47
AAA49642.1 albumin, partial [Xenopu	AAA49642.1	99	12.12
PNY10534.1 albumin [Trifolium prate	PNY10534.1	132	13.64
PNY10533.1 albumin [Trifolium prate	PNY10533.1	131	12.98
PNX81652.1 albumin [Trifolium prate	PNX81652.1	142	13.38
PNX59123.1 albumin [Trifolium prate	PNX59123.1	123	14.63
PNX56728.1 albumin, partial [Trifol	PNX56728.1	91	23.08
CAC81903.1 albumin, partial [Mus mu	CAC81903.1	205	8.78
sp P02768.2 ALBU_HUMAN RecName: Ful	sp P02768.2 ALBU_H	609	7.88
NP_001075972.2 albumin precursor [E	NP_001075972.2	607	9.06
NP_001009376.1 albumin precursor [O	NP_001009376.1	607	8.73
NP_001075813.1 albumin precursor [O	NP_001075813.1	608	9.21
NP_001009961.1 albumin precursor [F	NP_001009961.1	608	9.21
XP_072191373.1 albumin [Excalfactor	XP_072191373.1	615	9.11
XP_067413103.1 albumin [Emydura mac	XP_067413103.1	618	8.90
XP_010206335.1 albumin [Colius stri	XP_010206335.1	615	8.94
XP_006265713.1 albumin [Alligator m	XP_006265713.1	615	9.59
XP_053832713.1 albumin [Vidua macro	XP_053832713.1	615	9.92
NP_001310707.1 albumin precursor [E	NP_001310707.1	607	9.06
XP_039406875.1 albumin [Corvus corn	XP_039406875.1	615	9.59

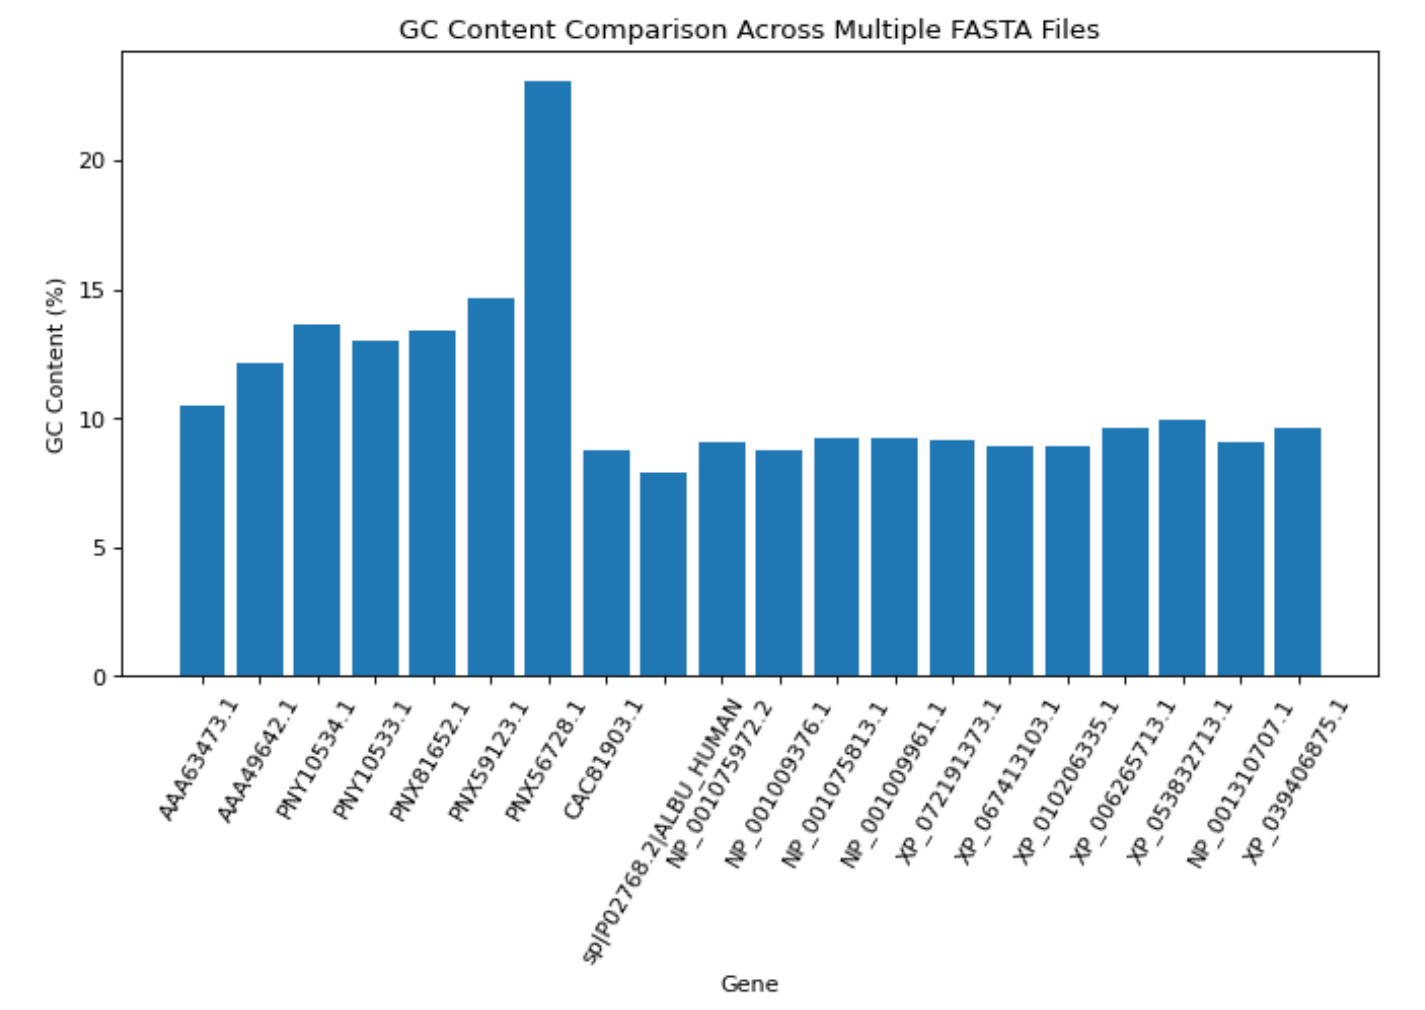

GC Content Distribution

This histogram represents the frequency distribution of GC content values among uploaded FASTA sequences. It helps identify variability and clustering of GC composition.

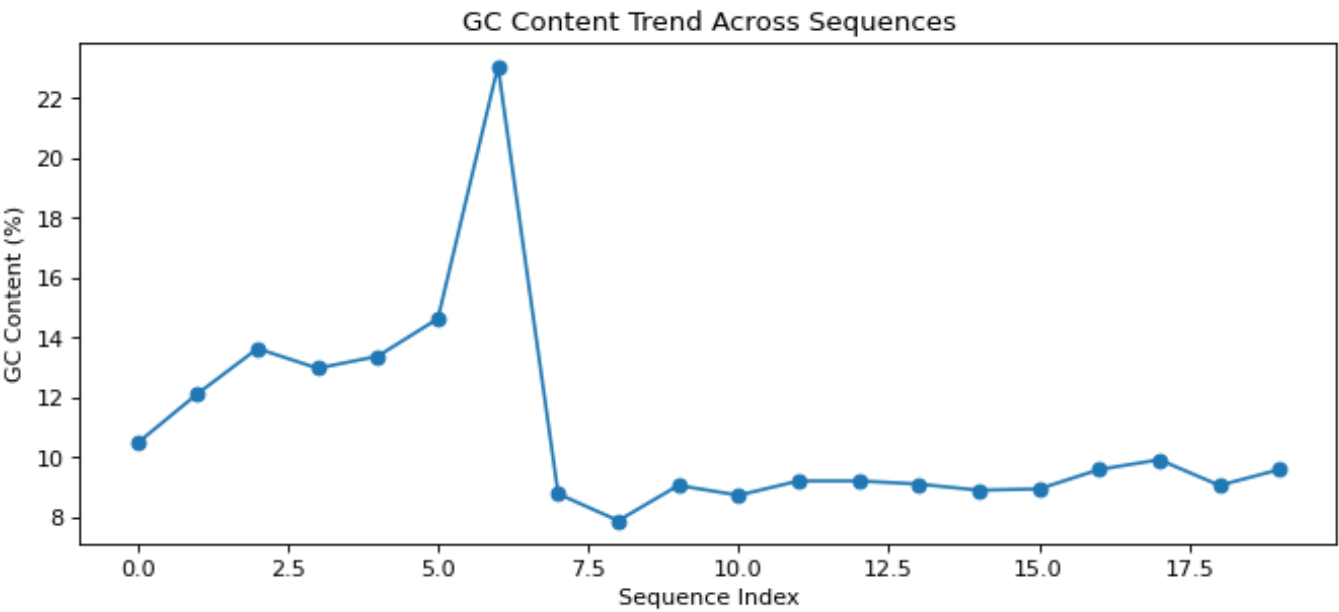

GC Content Comparison

This comparative bar chart visualizes GC percentages across different genomic sequences, enabling comparative biological interpretation.

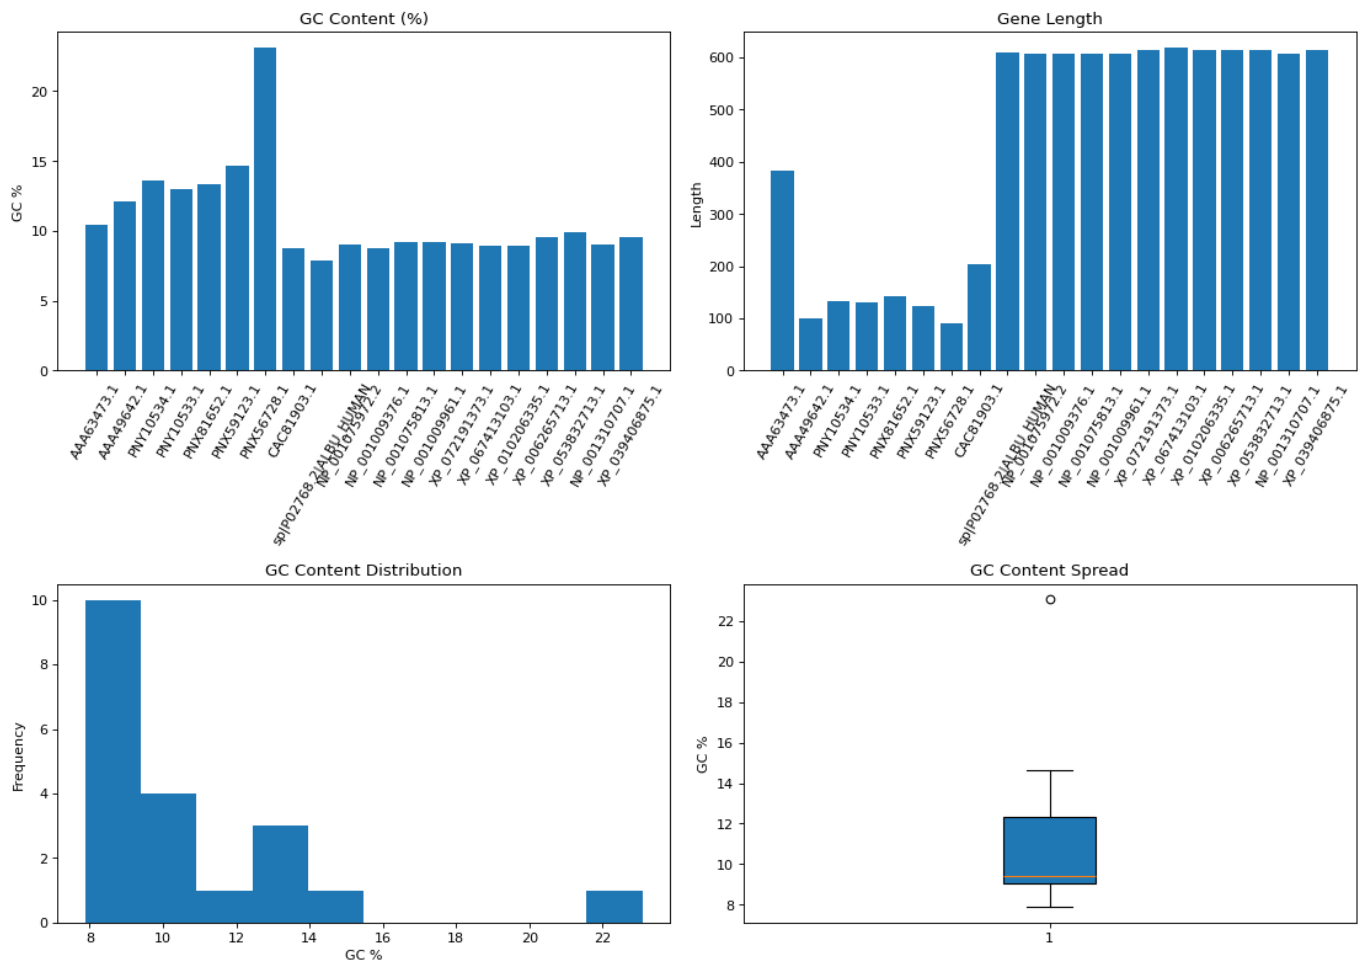

GC Content Trend

This trend plot illustrates sequential changes in GC content values across analyzed sequences.

Additional GC Content Analysis

This advanced visualization combines multiple analytical perspectives including GC distribution, gene length variation, comparative GC content, and spread analysis.

About Biocode Innovators

Biocode Innovators bridges the gap between biology and computational technology. The community focuses on empowering students, researchers, and professionals through bioinformatics education, biological data visualization, computational biology, and modern genomic analysis tools.

Core Focus Areas:

- Computational Biology
- Biological Data Visualization
- In-silico Analysis
- Python and R for Biology
- Data-driven Life Science Research

Mission:

Make biological data accessible, understandable, and actionable.

Vision:

Enable the next generation of scientists to leverage computational technologies in biology.
